DETAILED ACTION

In Paper No. 10, received 11/19/02, applicant canceled claims 1-7 and 15-20, and amended claims 9, 10 and 12.

Claims 8-14 will be examined in this office action.

Claim Rejections - 35 USC § 112

Upon further review, rejections under 35 U.S.C. 112, 1st paragraph and 35 U.S.C. 112, 2nd paragraph are withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to

overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 31 and 33 of U.S. Patent No. 6,057,367. Although the conflicting claims are not identical, they are not patentably distinct from each other because Claim 1 of the '367 patent describes a method of inhibiting growth of pathologically proliferating mammalian cells comprising administering antiproliferative amount of one or more manipulators of nitrosative stress, whereby nitrosative stress selectively kills or reduces the growth of said mammalian cells. The pathologically proliferating mammalian cells are those that would cause restenosis. In claim 31 of the '367 patent, the pathologically proliferating mammalian cells are cancer cells. In claim 33 of the '367 patent, the pathologically proliferating mammalian cells are those in Hodgkin's disease, small cell lung cancer, cancer of the breast, testicular cancer, or prostate cancer. In the instant specification, page 22, lines 21-22 recite agents for imposing nitrosative stress to inhibit proliferation of pathologically proliferating cells. Claim 11 of the instant application recites pathologically proliferating mammalian cells that are cancer cells. Claim 12 of the instant application recites pathologically proliferating mammalian cells in Hodgkin's disease, small cell lung cancer, cancer of the breast, testicular cancer, or

prostate cancer. Claim 13 of the instant application recites pathologically proliferating cells in restenosis.

Conclusion

All claims are rejected.
